

EDUCATION

Purdue University, College of Engineering
Bachelor of Science, Motorsports Engineering

Indianapolis, IN
Class of 2029

- Completed Coursework: Multivariate Calculus, Modern Mechanics, Transforming Ideas to Innovation EPICS/VIP, General Chemistry I, C Programming (3.43 GPA)
- Coursework in Progress: Statics, Thermodynamics I, Motorsports Programming, Motorsports Intro to Modelling

Leigh High School
High School Diploma (4.17 GPA)

San Jose, CA
Class of 2025

- Four years of Project Lead the Way engineering pathway - mechanical design, circuit analysis, and data modeling
- Capstone Project: Built an Arduino inventory system using load cells for automated item quantification
- Founder of LEGO and Car Clubs; Vice President of Aerospace and Astronomy Clubs

PROFESSIONAL EXPERIENCE

Purdue University, College of Engineering
FYE Undergraduate Teaching Assistant

Indianapolis, IN
Jan 2025 - May 2025

- Assist first-year engineering students in Transforming Ideas to Innovation course with Excel, Matlab and Python
- Scope includes in-class room teaching support, office hours, prep work and meetings

Stratnel Technologies, LLP
Intern

Bengaluru, India
Jun 2024 - Jul 2024

- Engineered precision industrial components using Fusion360, focusing on reverse engineering and dimensional accuracy to ensure designs met strict manufacturing tolerances.
- Optimized rapid prototyping workflows by evaluating and implementing SLS, SLA, and FDM technologies to determine the best material and process for scalable production.

PROJECTS & LEADERSHIP

Purdue Motorsports Engineering Team
Junior Board Media Officer and Sponsorship Sub Team

Indianapolis, IN
Sep 2025 - Present

- Actively create and manage corporate and community partnerships to secure critical resources and funding required for club vehicle development and team operations
- Solely responsible for club social media strategy and race day Purdue Grand Prix photography, as well as designing and maintaining the team website: *mecpurdue.com*

EPICS 460 Motorsports Outreach
Project - Model Wind Tunnel with Arduino

Indianapolis, IN
Sep 2025 - Dec 2025

- Electrical Design Lead responsible for implementing an Arduino system to determine downforce in a model wind tunnel to be used by Purdue Motorsports Engineering Faculty for campus visits

Other Projects: Vice President of Purdue Badminton Club Indy, co-founded Echo-EDU—a 200+ user tutoring non-profit, and grew a design-focused YouTube channel to 11k+ subscribers and 4.5M+ views.

SKILLS & INTERESTS

- CAD: Solidworks and Fusion360
- Software: Python, C, Matlab, HTML, ROBOTC, Excel, NI Multisim, DaVinci Resolve
- Skills: Sponsorship Marketing, Video Editing, Graphic Design
- Languages: Spanish (Limited Working Proficiency)
