SUMMARY

Purdue University Sophomore majoring in Motorsports Engineering with experience in sensor instrumentation, analysis of large datasets, and library-based programming. Purdue Grand Prix crew member for Purdue Motorsports Engineering Team. Electrical Design Lead for an Arduino-based wind tunnel. Teaching Assistant for Python, MATLAB, and Excel. Deep interest in vehicle performance, aerodynamics, and race operations. Student Board Member for Purdue Motorsports Engineering Team.

EDUCATION

Purdue University, College of Engineering, Indianapolis, IN

Bachelor of Science, Motorsports Engineering. *Expected graduation: May 2029. GPA 3.21*

- *Completed:* Multivariate Calculus, Modern Mechanics, C Programming, General Chemistry I, Transforming Ideas to Innovation (EPICS/VIP). *In progress:* Statics, Thermodynamics I, Motorsports Programming and Intro to Modeling

Leigh High School, San Jose, CA. Graduated in 2025. 4.17 GPA

- Four-year Project Lead the Way engineering pathway: mechanical design, circuit analysis, and statistics; AP Statistics

TECHNICAL SKILLS

Programming & Analysis: Python, matplotlib, Pandas data-analysis, MATLAB, Excel, C, HTML, Git, Google Cloud APIs

Instrumentation & Data Acquisition: Arduino sensor systems, load cells, signal wiring and calibration, NI Multisim, ROBOTC

CAD & Design: SolidWorks, Fusion 360, graphic design, DaVinci Resolve, Adobe Lightroom

Languages: English (native), Spanish (limited working proficiency)

Certification: Google Skills Professional Machine Learning Engineer Certification (In Progress)

MOTORSPORTS & INSTRUMENTATION EXPERIENCE

Electrical Design Lead, EPICS 460 Motorsports Outreach, Purdue University, Sep - Dec 2025

- Led electrical design of an Arduino instrumentation system that measures downforce on a model wind tunnel. Built to serve as a demo for prospective Motorsports students

Junior Board Media Officer, Purdue Motorsports Engineering Team, Sep 2025 - Present

- Lead the Media team responsible for media strategy, including race-day Purdue Grand Prix photography, social media handling and ownership of the team website, mecipurdue.com

PGP Kart 2 Crew Member, Purdue Motorsports Engineering Team, Sep 2026 - Present

- Engineering crew member working on a Yamaha KT-100 kart to compete in the Purdue Grand Prix

McLaren F1 Laptime Data Analyzer, ENGR13300 Final Project Purdue University, Dec 2025

- Developed a Python-based Formula 1 data analysis tool that parses and visualizes McLaren driver lap times from CSV time-series data. Features robust error handling for missing/malformed data and generates comparative matplotlib visualizations of lap progression and delta times: github.com/sanjkris-git/Engr133-Project-Final

PROFESSIONAL EXPERIENCE

FYE Undergraduate Teaching Assistant, Purdue University, Indianapolis, IN, Jan - May 2026

- Supported students of the Transforming Ideas to Innovation class with Excel, MATLAB, and Python. Explained quantitative tools and modeling workflows through in-class instruction, office hours, and course prep

Engineering Intern, Stratnel Technologies LLP, Bengaluru, India, Jun - Jul 2024

- Reverse-engineered and modeled precision industrial components in Fusion 360, holding dimensional accuracy to strict manufacturing tolerances. Evaluated SLS, SLA, and FDM rapid-prototyping processes and recommended the material and process combination best suited for scalable production

PROJECTS & LEADERSHIP

High school capstone: a load-cell measurement system (using Arduino) for automated item quantification. Co-founder of Echo-EDU, a tutoring non-profit serving 200+ students. Creator of a design-focused YouTube channel with 11k+ subscribers and 4.5M+ views. Founder of LEGO and Car Clubs, and VP of Aerospace and Astronomy Clubs in high school.
